DETAILED ACTION

1. The Information Disclosure Statement filed by applicant on February 2, 2004, is acknowledged and has been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, applicant's recitation of "a first substantially rigid plate, a second substantially rigid plate, a third substantially rigid plate integral with the ski" suggest that the ski has 5 rigid plates since claim 1, also recites "a first substantially rigid plate and a second substantially rigid plate." As best understood by the written description and the drawings, applicant's claims will be examined for a ski which has at most three substantially rigid plates.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3618

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-3 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Rohlin (US Patent 4,979,761).

Rohlin discloses a ski having a first and second substantially rigid plate (18, 20); first and second plate linkages (56) connecting the first and second substantially rigid plates (18, 20); the first linkage (56) defines a first and second flexure axis with the first and second substantially rigid plate (18, 20); and, the second linkage (56) defines a third and fourth flexure axis with the first and second substantially rigid plate (18, 20). Force on the second plate (20) can compressibly move the second substantially rigid plate relative to the first substantially rigid plate (18) and the first linkage (56) maintains the first flexure axis substantially parallel to the second flexure axis, and the second linkage (56) maintains the third flexure axis substantially parallel to the fourth flexure axis during compression of the second plate (20) thereby attenuating impacts. The ski further includes a plurality of resilient elements (42) located between the first and second plates (18, 20). See column 3, lines 39-47 and column 4, lines 3-20.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/636,134

Art Unit: 3618

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rohlin

('761) in view of Arduin (US Patent 5,647,605).

Rohlin disclose the claimed invention except for linkages as formed rods.

Arduin teaches connecting rods (30, 35).

Based on the teachings of Arduin, it would have been obvious to one having

ordinary skill in the art, at the time the invention was made to modify the ski of Rohlin to

include connecting rods instead of plates to simplify the design of the ski to reduce

manufacturing cost.

Allowable Subject Matter

5. Claims 11-14 are objected to as being dependent upon a rejected base claim,

but would be allowable if rewritten in independent form including all of the limitations of

the base claim and any intervening claims.

6. Claims 4-6 would be allowable if rewritten to overcome the rejection(s) under 35

U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the

limitations of the base claim and any intervening claims.

Conclusion

7. Any inquiry concerning this communication should be directed to Bridget Avery at

telephone number 703-308-2086.
